Event Description

The Intercollegiate Robotics Challenge 2026 brings together engineering teams from across the region to compete in autonomous navigation, object manipulation and real-time problem solving. Teams will face staged challenges designed by industry judges. The day includes keynote talks, hands-on workshops and demo booths from partner companies.

Challenge highlights:

- Autonomous Maze Navigation — timed runs with penalty rules
- Precision Object Sorting — accuracy and speed judged
- Innovation Pitch — shortlisted teams present to sponsors

Venue

Innovation Hall, North Campus • 1.2 km from Central Station

FAQs

Q: Can I register as an individual and join a team later?

A: Yes, individual registrations are allowed for the exhibition track. Competitive teams must register together before qualifiers.

Q: Are travel reimbursements available?

A: Limited travel grants are available for finalists; details will be communicated to shortlisted teams.

Q: What safety equipment is compulsory?

A: All teams must bring safety goggles and supply compliant battery containment. Full checklist in the rulebook.

Are batteries provided or should we bring our own? Also what's the weight limit?
